PERIOD OF USE:			
April 1 – October 31			
PLACE OF USE Before and after Change:	PURPOSE OF USE Before and after Change:		
Service area of the Selah-Moxee Irrigation District	Irrigation and incidental domestic supply which		
There is no request for change in place of use.	includes irrigation of lawns, gardens & landscaping		
There is no request for change in place of use.	includes irrigation of lawns, gardens & landscaping		
IRRIGATION METHOD:	1		
Sprinkler, Rill & Drip			

CONSUMPTIVE USE CALCULATION:

This application is for change in point of diversion only, with use to be on the same land. Therefore, no consumptive use calculation is necessary

NARRATIVE DESCRIPTION OF PROJECT:

SMID has filed a Petition for Order Pendente Lite requesting an additional point of diversion for water historically diverted from the washed out Moxee diversion and the temporary pumping plant in the ROZA wasteway. The additional point of diversion is at the East Selah diversion of the SMID. This upstream change in point of diversion has no effect on TWSA and will have minimal effect on the reach between the old diversion and the additional diversion due to the small quantity sought to be included in the change. Of the 40+ cfs and 14,740 acre-feet currently diverted at the existing diversion, only 4,740.4 acre-feet and up to 13.4 cfs is included in the proposed temporary change. During September and October (flip-flop) the maximum additional diversion at the proposed additional point of diversion would be 10 & 7 cfs respectively. When the ROZA power plant is not in operation, there is insufficient water at the pumping plant to pump water into the lower SMID canals.
